

June 8 , 2005, San Juan, Puerto Rico

PACIV SELECTED AS ONE OF 20 BEST EMPLOYERS

PACIV, the largest automation and computer system validation company in Puerto Rico -founded and registered in 1997 by the engineer Jorge L. Rodriguez received the recognition as one of " Puerto Rico's Top 20 Employers 2004". The official ceremony presented by El Nuevo Día, Hewitt Associates, Price

Waterhouse Coopers and Mediafax, Inc., took place yesterday at the Bankers Club.

"For us it is an honor and privilege being recognized as one of the B e s t 2 0 Employers of Puerto Rico. Also, in addition to being recognized among all companies in all industries within Puerto Rico it is a distinction earned by our own associates. We want to continue making our country proud and, above all, our associates, clients and friends. Only by giving our best quality of service to our internal clients, our associates, we will be able to expect them to provide to our external clients the best of their services" commented Jorge L. Rodriguez, President of PACIV.

PACIV provides turn key engineering services in computer control systems such as design, configuration, installation, commissioning and instrumentation.

PACIV turnkey automation solutions enhances production capability, ensures maximum return on assets, optimizes manufacturing plant performance and provides operational excellence while significantly reducing overall costs. Its clients include major biopharmaceuticals such as Amgen, Abbott, BMS, IPR Astrazeneca, Pfizer, J&J and Eli Lilly.

PACIV consists of over 135 automation professionals in the areas of automation engineering, instrumentation technicians, computer system validation specialists and technical writers, properly certified and with profound experience in computer system validation and computer control systems such as DeltaV, Foxboro, Allen Bradley (SLC, PLC, ControlLogix), IFIX, RSView and bus technologies such as Foundation Fieldbus and DeviceNet.

PACIV has additional offices in Indianapolis (USA) and also provides services in Ireland.

PACIV has been characterized for providing the highest quality of service in the areas of automation, control systems, instrumentation and computer system validation. PACIV has differentiated itself by creating strategies where its certified and experienced resources are utilized to leverage the computer controls systems commissioning activities with the validation testing activities in such a way that costs and delivery times are reduced.
